APPLICATION FOR AMENDMENT  
OF POLLUTION CONTROL PER-  
MIT PA-1806

*Preamble*—Gulf Oil Canada Limited is requesting formal amendment of its present air permit issued December 29, 1976, to delete the requirement for installation of an Amine Scrubber/Sulphur Recovery Plant complex. Installation of the very small-sized Sulphur Recovery Plant called for in the present permit would place an almost intolerable financial burden on such a small refinery. In addition to this, the complex could not be expected to be serviceable more than 95 per cent of the time nor could it ensure that British Columbia ambient air quality objectives for SO<sub>2</sub> were being met on a continuous basis.

To overcome these obvious disadvantages, Gulf would like to proceed with what it considers a more effective and less costly plan of action. The proposed course of action is used in other jurisdictions and is based upon the results of the SO<sub>2</sub> monitoring system operated around the refinery by the Company during the August 1977 to January 1978 period.

The Company would like to install three SO<sub>2</sub> monitors in the nearby residential area and continually telemeter the readings to the refinery. When the monitors indicate a rising level of SO<sub>2</sub>, the emission of SO<sub>2</sub> would be curtailed by cutting back plant operations on a scheduled basis until the level subsides. Since the air monitoring studies showed that high levels of SO<sub>2</sub> are most likely to occur during the critical winter months, Gulf would plan to run only a low sulphur crude oil during these months. This would have the effect of continuously reducing total SO<sub>2</sub> emissions to about the same level as that attainable from a Sulphur Recovery Plant. Results from the monitors would be sent to the Government each month and after one year of operation the effectiveness of this approach would be reviewed with the Government.

Gulf believes that amendment of the permit will permit control of SO<sub>2</sub> at all times within levels prescribed by the Province. The system can be made operational within eight months from approval of the permit amendment compared with about 18 months for the Sulphur Recovery Plant. While there will be an added cost to the refinery for low sulphur crude oil, the Company believes the extra cost is acceptable under the circumstances.

THIS APPLICATION is to be filed with the Director, Pollution Control Branch, Parliament Buildings, Victoria, B.C. Any person who qualifies as an objector under section 13 (2) or (3) of the *Pollution Control Act* may, within 30 days of the date of application, or within 30 days of the date of publication

in *The British Columbia Gazette* or in a newspaper, or, where service is required, within 30 days of the serving of a copy of the application, file with the Director an objection in writing to the granting of a permit, stating the manner in which he is affected. Those who do not so qualify may file with the Pollution Control Board an objection in writing under section 13 (6), in the same manner and time period as described above.

Those who do not so qualify may file with the Pollution Control Board an objection in writing under section 13 (6), in the same manner and time period as described above.

Central Fraser Valley Regional District, 26982 Fraser Highway (Box 490), Aldergrove, B.C. V0X 1A0, hereby applies for amendments, as described below, to Pollution Control Permit PE-351, granted on June 19, 1970 (amended March 2, 1971, and July 21, 1978), which authorized the discharge of a daily maximum of 3,000,000 gallons of effluent from a municipal sewerage system located at Matsqui, Sumas, Abbotsford, B.C., to Fraser River.

The site of the discharge is near the foot of Gladwin Road in Matsqui and about 6,000 feet downstream from Mission Bridge.

To amend the permit by deleting the words "a daily maximum of 3,000,000 gallons; BOD, 100 mg/L; suspended solids, 100 mg/L; no toxic chemicals; aeration in stabilization ponds with effluent chlorination; septic tank discharges and an expiry date of December 31, 1980." and substituting therefor the words "a daily maximum of 4,500,000 gallons; BOD, 100 mg/L; suspended solids, 100 mg/L; intermediate level physical-chemical plant with integrated sludge handling facility, the proposed works to be in operation by December 31, 1980."

The purpose of the foregoing amendments is to allow the phasing out of service of the existing aerated lagoons at Valley Road and Industrial Road, and to locate a new treatment facility with capacity for future growth near the foot of Gladwin Road on Fraser River—Section 8, Township 17, 14619F, 14686F, Sketch Plan 690, Sketch Plan 12710, Plan 11938, Plan 11938, Plan 44168.

I, P. R. Moritz, Acting Secretary-Treasurer, hereby certify that a copy of this application has been received by the Central Fraser Valley Regional District.

This application, dated September 28, 1978, was posted on the ground in accordance with the Pollution Control Regulations.
